Elderly Assist Ltd

Letter of Recommendation from Alastaire Hall, Lawyer

"Recently I employed the services of Elderly Assist for packing up the belongings of a client who had gone into fulltime care....On contacting Elderly Assist I received immediately a full rundown on what they could do and also their charge out rate...It took approximately five days from when they began to when the property was completely empty...At the end I was provided with a comprehensive inventory of both category and individual items of property...In the future I will have no hesitation in either using or recommending the services of Elderly Assist Limited where there is no one available on a voluntary basis to pack up the items in the home for removal."
